

WDU TRUST TOKEN (WDU)

Founder Declaration

by woodi usimo – Fixed-Supply BEP-20 Token on BNB Smart Chain

Declaration

I, **woodi usimo**, declare that I am the founder and initiator of the WDU Trust Token (WDU) project. This project is a personal initiative to deploy a fixed-supply, immutable BEP-20 token on the BNB Smart Chain mainnet with full transparency.

All project documentation, updates, and communications are managed by me or designated contributors under my coordination. The project remains fully transparent, with all on-chain activity publicly verifiable via BscScan.

Project Initiation & Coordination

As the founder, I am responsible for:

- Deployment of the smart contract (verified on BscScan on December 18, 2025)
- Preparation and maintenance of all project documentation
- Coordination with independent contributors for technical review and website support
- Ensuring alignment between published information and on-chain data

Project Purpose

WDU Trust Token is a fixed-supply BEP-20 token designed for transparency and on-chain visibility. The contract enables observation of real gas consumption, standard BEP-20 event emission, allowance and approval mechanisms, gradual on-chain distribution, and immutable behavior under real network conditions. Total supply is permanently fixed at exactly 700,000,000,000,000 WDU (700 trillion).

Ownership & Control

Contract ownership remains with the deployer address to maintain implementation stability.

Contract Address: 0x74D7d1aD19bD14655cD0Ab26BEcc57ED69d69413

The contract contains no privileged functions (no mint, burn, pause, upgrade, tax, or administrative controls). It is a pure, standard BEP-20 implementation.

Risk Disclosure

Interacting with any cryptocurrency involves risks including market volatility, smart contract behavior, network conditions, and potential loss of funds. WDU Trust Token (WDU) is a standard BEP-20 token. Users should conduct their own research and only use amounts they can afford to lose. The founder and contributors disclaim all liability for any losses or decisions made by users.
