

WDU TRUST TOKEN (WDU)

Official Whitepaper

Fixed-Supply Immutable BEP-20 Token on BNB Smart Chain Mainnet
Verified Contract • Immutable Logic • Transparent On-Chain Distribution

1. Introduction

WDU Trust Token (symbol: WDU) is a fixed-supply, immutable BEP-20 token deployed on the BNB Smart Chain mainnet. It features a permanently capped total supply and a fully verified smart contract. The project prioritizes transparency, immutability, and full public verifiability of every transaction and holder balance. The contract was verified on BscScan on December 18, 2025.

2. Project Purpose

WDU was created as a transparent and immutable BEP-20 token on BNB Smart Chain mainnet with a fixed supply and clear on-chain visibility. The design focuses on simplicity, security, and the ability for anyone to observe real transfers, approvals, events, and holder distribution in a live environment without custom fees, taxes, reflections, or administrative overrides. The project serves as a live reference implementation for educational and transparency purposes.

3. Token Parameters (Immutable)

Parameter	Value
Name	wdustrust
Symbol	WDU
Decimals	18
Total Supply	700,000,000,000,000 WDU (700T) – Fixed at deployment
Contract Address	0x74D7d1aD19bD14655cD0Ab26BEcc57ED69d69413
Standard	BEP-20
Network	BNB Smart Chain (Mainnet)
Verified	December 18, 2025

No mint, burn, tax, pause, upgrade, blacklist, or administrative functions exist. The contract is permanently immutable in logic and supply.

4. Supply Structure & Transparency

Total Supply Clarification

Total supply is permanently fixed at 700,000,000,000,000 WDU (700 trillion). The supply was minted once at deployment and remains capped forever. No mechanism exists to increase or decrease the total supply.

On-Chain Distribution & Holders

Token distribution is gradual and transparent. All changes are fully visible on the BNB Smart Chain. The initial supply is held by the deployer wallet for controlled release.

View Current Holders:

5. Distribution

Tokens are distributed manually by the project coordinator upon request. All distributions are transparent and fully visible on-chain via BscScan. Requests can be sent to admin-wdu@quazenthor.com.

6. Technical Transparency

Verified Source Code:

<https://bscscan.com/token/0x74D7d1aD19bD14655cD0Ab26BEcc57ED69d69413#code> (Verified: December 18, 2025)

Deployer / Owner Wallet can be inspected directly on BscScan linked from the contract page.

The smart contract implements only standard BEP-20 functions. No custom administrative controls exist.

7. Project Owner / Founder

woodi usimo is the founder, owner, and primary coordinator of the WDU Trust Token project. He deployed the fixed-supply BEP-20 token on BNB Smart Chain mainnet with a strong focus on transparency, immutability, and clear on-chain distribution. As the deployer, he maintains contract stability while overseeing gradual token distribution and all project documentation. Independent contributors, if any, assist only in documentation and technical review; none have control over the contract logic or token supply.

8. Contract Details & Functions

The smart contract implements only standard BEP-20 functions: transfer, transferFrom, approve, allowance, balanceOf, totalSupply, name, symbol, decimals. No custom functions, no administrative controls, and no privileged roles exist beyond standard ownership where applicable. The contract is non-upgradeable and the total supply is fixed forever.

9. Official Channels

These are the only official channels for WDU Trust Token. Beware of impersonators.

10. Risk Disclosure & Legal Disclaimer

Interacting with any cryptocurrency involves risks including market volatility, smart contract behavior, network conditions, and potential loss of funds. WDU Trust Token is a standard BEP-20 token. Users should conduct their own research and only use amounts they can afford to lose. The founder and contributors disclaim all liability for any losses or decisions made by users. The project has no affiliation with Binance, BscScan, MetaMask, PancakeSwap, or any other third-party platform.
